PROFILE

Seeking a dynamic engineering role where I can apply my expertise as a MERN Stack Web Developer, leveraging strong problem-solving skills and proficiency in JavaScript frameworks to contribute to innovative, scalable web solutions. Driven by a passion for responsive design and efficient back-end integration, I aim to collaborate on cutting-edge projects that foster continuous learning and advancement in the field of web development

PROJECT

Institutes Management App
An all-in-one platform for managing app
2024 - present

- The Institutes Management App is specially designed for educational institutions, enabling efficient management of institutes' data, including details like name, description, contact, and images. It leverages MongoDB Atlas for cloud-based database management, Cloudinary for secure image storage, and Node.js with Express for building scalable RESTful APIs. The React.js frontend provides a dynamic user interface with easy form handling and real-time updates using Formik and axios, ensuring a seamless management experience for administrators

Portfolio_Resume
2024 - 2024

- Portfolio -Description: "In my portfolio website, I meticulously design and develop professional profiles, seamlessly blending resume creation with self-developed projects. Each aspect is meticulously crafted to showcase expertise and experience in a polished and professional manner,

E-Commerce App
E-Commerce web Application
2024- 2024

- E- Commerce-Description: Our e-commerce project integrates Node.js and MongoDB for secure transactions and efficient order processing. Using React.js and CSS, we create a responsive frontend for a user-friendly experience. Integrated payment gateways and advanced inventory management enhance operational efficiency, ensuring a seamless shopping journey with personalized features and dynamic recommendations.
